

Linking to URL

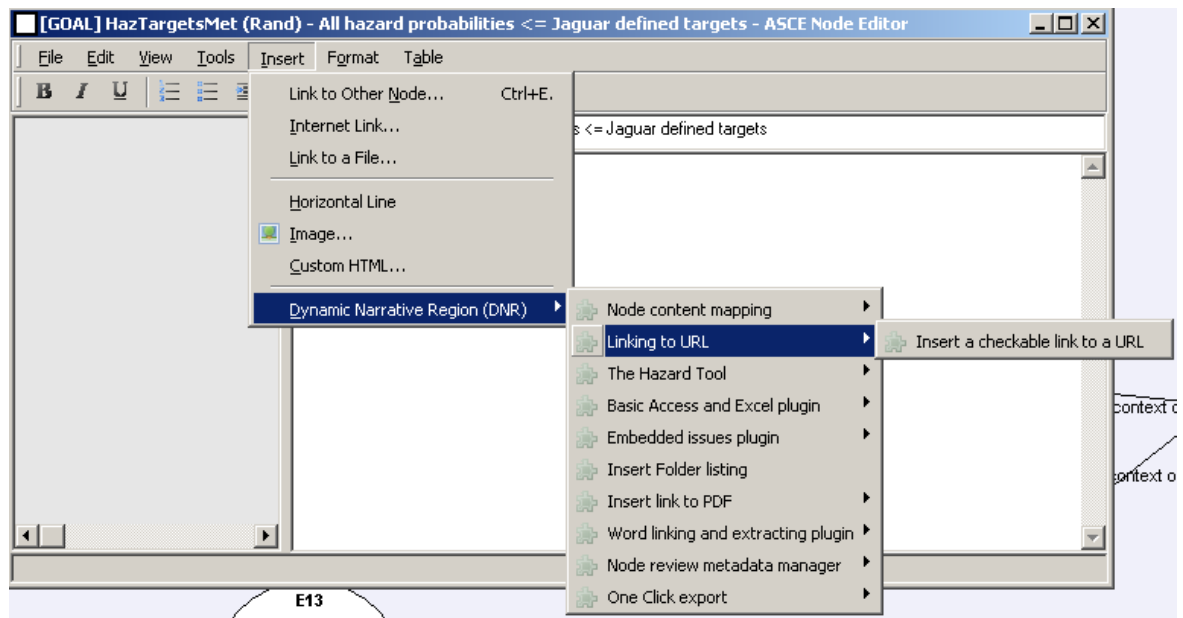

Plugin Manual for ASCE 4.2

- File name: adelard linking to url.xml
- Version: 0.1.5
- Applies to: All networks

1 Description

This plugin allows a link to be set to a URL, and that URL can be checked for changes.

Once installed and enabled, the plugin adds a menu item to the Insert->DNR menu list in the ASCE Node Editor. The menu item can be accessed as shown in the diagram below.

2 Linking to URL

This DNR allows the insertion of a valid URL (must start with http:// or https://) with an optional descriptive title. The URL can be checked for changes.
