

List User Views

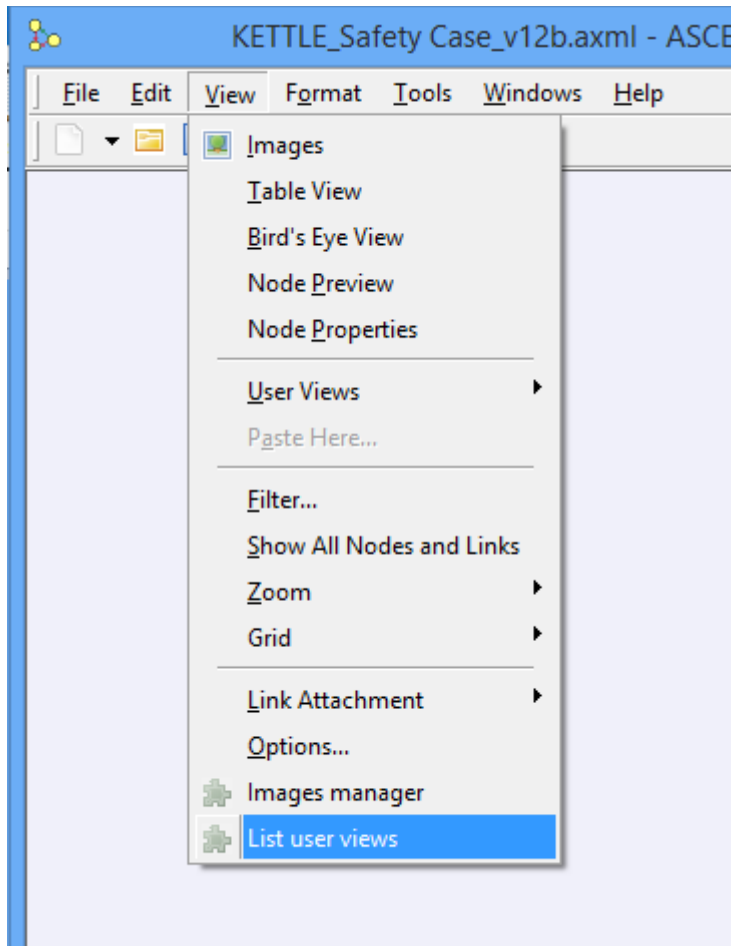

Plugin Manual for ASCE 4.2

- File name: adelard list user views.xml
- Version: 0.0.1
- Applies to: All networks

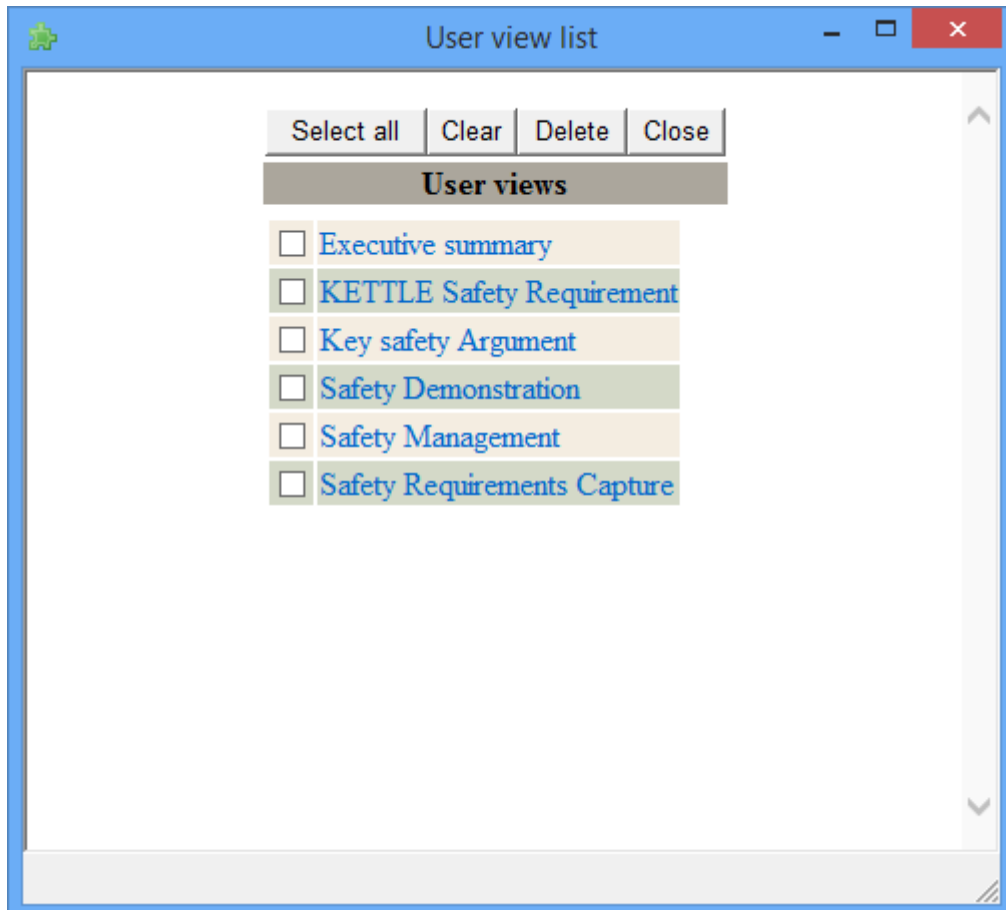

1 Description

The List user views plugin for ASCE allows you to list all user views in the current network

The plugin allows the user to list and edit the user view list. To use the plugin, from within some ASCE network, under the View menu, choose the following menu item: View→List user views

This will display the following window:

The following options are available:

- Select all - to select all the User views listed.
- Clear - to clear selected User views from the list.
- Delete - to delete selected User views from the list and from the network.
- Close - to close the "User view list" window.
