# Microsoft Word Linking

## Plugin Manual for ASCE 4.2

- File name: adelard word linking and embedding.xml
- Version: 0.1.12
- Applies to: All networks

### 1 Description

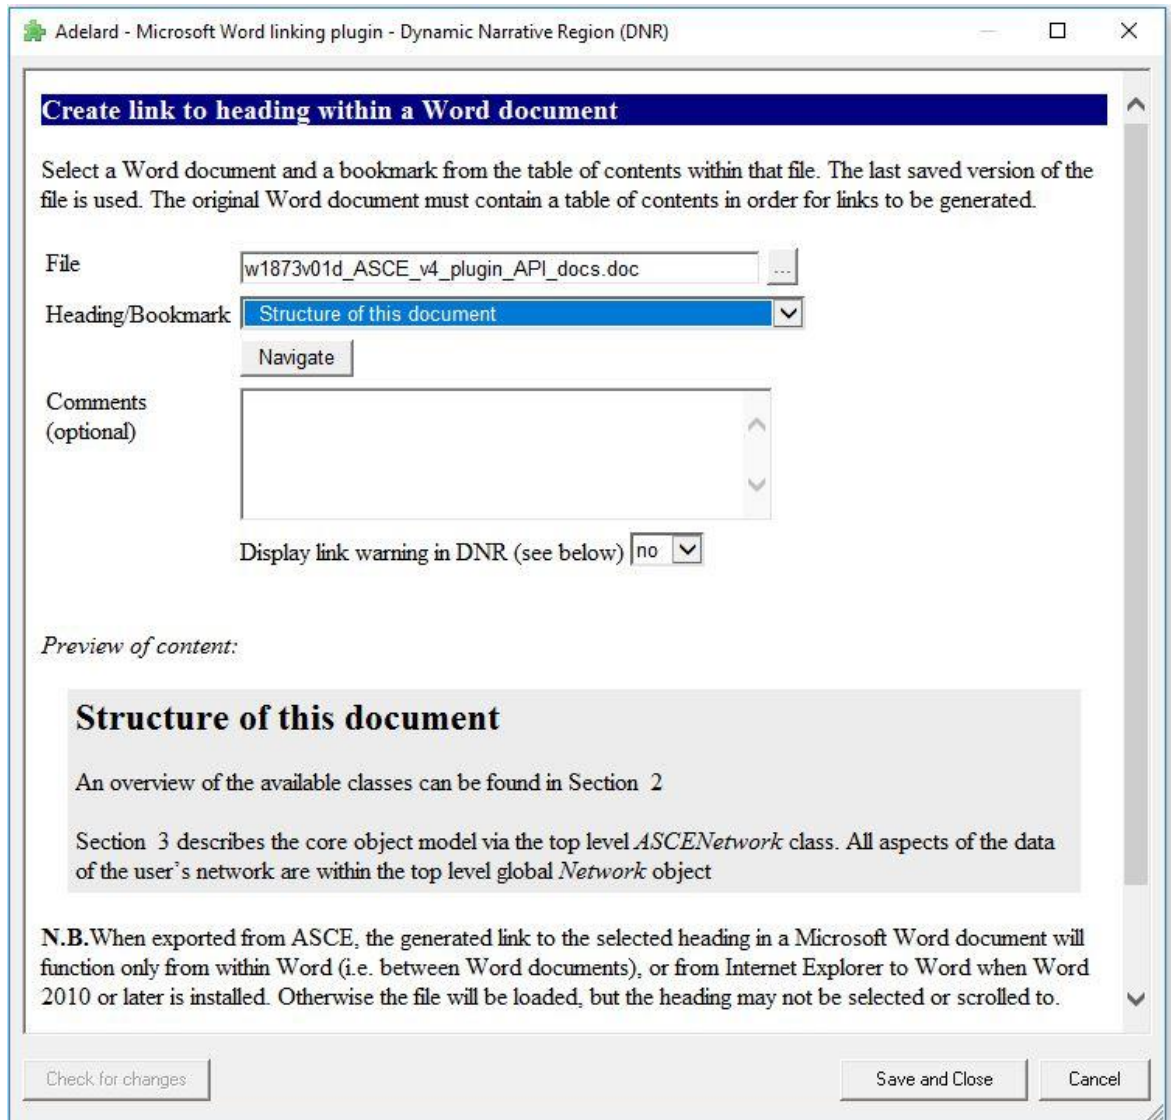

This plugin provides two DNRs for linking to and extracting content from Microsoft Word documents (.doc or docx).

This plugin works with the one click export plugin "remove DNR containers" feature.

This plugin provides two DNRs for linking a specific heading in a Word document, or extracting a range of content from a Word document. This can be useful when referring to evidence that is held in external Word documents.

Linking to a specific heading in a Word document:

Extracting content from a Word document:
